SUMMARY

I design and develop SQL databases and create applications in Django, python, and REST framework. In addition, I create front-ends in HTML5/CSS and JavaScript. I understand marketing principles and have basic understanding in 510(k) medical device regulatory process. I am looking for data analyst, marketing analyst, regulatory affair or similar roles.

EXPERIENCE

Marketing Specialist | Mediverse International, Inc. | Arcadia | California
April 2011 – August 2021
- Design and implement database solutions using Microsoft SQL Server backend and Microsoft Access frontend
  - In-house U.S. FDA 510(k) premarket notification database for data mining new suppliers
  - Product registration database for managing document requests and medical device technical requirements
- Design and implement solutions using Django and PostgreSQL database
  - Product complaint and adverse event database for analysis and trending
- Managed multiple successful medical device registration projects in mainland China and Taiwan markets for U.S. manufacturers, which are the prerequisites of over 80% of the company's total revenue
- Apply and maintain the California Wholesaler Pharmacy License for the company

Programmer | University of Missouri | College of Business | Technology Services | Columbia | Missouri
September 2007 – May 2010
- Work with clients to translate business requirements into technical requirements
  - Analyze client needs and suggested possible database solution
- Design, build and test multiple database projects according to client specifications
  - MS SQL Server 2005/2008, MS Access, ASP.NET/VB/C#
- Provide technical support for all new and existing MS SQL Server 2005/2008 databases and implement additional features based on user request
